

Dok-Box™ Pit Forming Kit

Reduce Dock Leveler Pit Forming Costs.

Conventional methods for pouring dock leveler pits can be costly and time consuming. The revolutionary Dok-Box Pit Forming Kit by Rite-Hite Aftermarket minimizes costs associated with pouring a dock leveler pit. The exclusive Dok-Box design slides and hooks together to easily create the pit you need.

REDUCES PIT FORMING COSTS

- Quickly slides and hooks together on-site without the need for additional hardware.
- No cutting of wood forms required.
- Each unit ships complete with front and rear squaring support members and center spacer support.
- Side and rear curb angles are integral to the panels.
- Two basic designs: "new construction" and "retro-fit".

SUPERIOR STRUCTURAL DESIGN

- 9-gauge steel side and rear panels.
- 1-1/2" x 9-gauge steel concrete anchors welded at 16" O.C.
- Tapered design for water run-off.
- Paint: one coat gray primer.

OPTIONS

- Dock bumper mounting plates (11" wide by 20" or 24" high).
- Dok-Lok mounting plate (23-1/2" wide by 20" high).

REDUCE DOCK LEVELER PIT FORMING COSTS

The Dok-Box Leveler Pit Forming Kit by Rite-Hite Aftermarket is an efficient system for forming dock leveler pits by doubling as a curb angle and a concrete pit form. The proprietary Dok-Box comes complete with front and rear squaring members for efficient, time saving set-up. The Quick-Hook™ Fastening System saves you time and money by sliding together to create the leveler pit that you need. Dok-Box Pit Forming Kit is backed with Rite-Hite's exclusive 1-year money back guarantee.
