

# SAFETY SOLUTIONS FOR YOUR LOADING DOCK

## TS-2000 Trailer Stand

- 6" x 30" top plate.
- Longer and wider handles for easy positioning.
- Single speed 12" crank.
  - Always in position, ready-to-use.
  - Easier operation helps insure proper use, increasing safety.
  - Minimizes maintenance.
- Heavy, 5-1/2" square tubular construction.
- Large 16" x 21" base pad.
- 16" diameter, solid rubber tires/foot bar combination for easy handling on any surface.
- Four drain holes prevent water collection.

### Prevent Landing Gear Collapse.

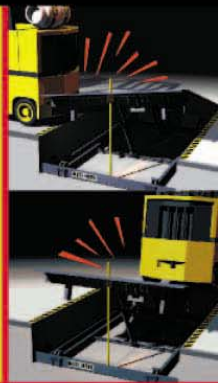

Seldom used or rusted landing gear may collapse under extreme weight conditions.

An unsupported spotted trailer can collapse with fork truck and driver inside, creating a hazardous situation.

## SAFE-T-STRUT™ Support System

Solidly supports the weight of a raised dock leveler so that maintenance personnel can work safely underneath. The unique through-the-lip design extension keeps the strut in place even if hydraulic dock leveler is raised to its maximum height. Painted safety yellow, the Safe-T-Strut helps comply with OSHA regulations such as 29 CFR 1910.147.

## LOADING Dock Lights

### FINISH

- Safety yellow powder coating. Rust-resistant.

### POLYCARBONATE HEAD

- High-impact.
- Cool-to-the-touch.
- 50% less weight than metal head.

### CONSTRUCTION

- 1-1/2" 14-gauge square steel tubing.
- Double-strut design for stability.
- Available in 40", 60" and 90" arm lengths.
